

CIRCULAR ECONOMY - WHY IS IT IMPORTANT?

DISCUSSION QUESTIONS

- 1. What is the circular economy, and how does it differ from the traditional 'use and throw away' model?**

How does this shift impact our environment and the way we consume products?

- 2. Getlini Eco is an example of a circular economy in action. How does this facility transform waste into valuable resources, and what are the benefits of such processes?**

Can you think of other facilities or initiatives that have adopted similar circular practices?

- 3. One key feature of the circular economy is viewing waste as a productive resource. How does this mindset change the way we handle waste, and what are some examples of waste being repurposed into new products?**

Do you think these practices could be implemented in your community or household?

- 4. Circular economy also promotes the use of services instead of owning products. What are some examples of this, and how might they contribute to reducing waste and conserving resources?**

Can the sharing economy (like bike-sharing or tool libraries) play a role in this? How?

- 5. The circular economy emphasizes 3E values: Environmental, Economic, and Emotional sufficiency. How do these values influence the success of circular initiatives like Getlini Eco?**

Why is it important to consider not just the environmental and economic impacts, but also the emotional or societal impacts of our consumption habits?
