

SAVE THE BEES - PROTECT THE ECOSYSTEM.

DISCUSSION QUESTIONS

- 1. Why are bees crucial to our ecosystem and what consequences could their extinction have?**

What other insects play a similar role and how can we protect them?

- 2. What simple actions can each of us take to create a bee-friendly environment in our surroundings?**

- 3. How do urbanisation and changes in the landscape affect bee and other pollinator populations?**

Are there any specific examples that you have noticed in your area?

- 4. Is it worth the time and resources to set up small ponds and rock gardens?**

What other local initiatives could support bee and biodiversity conservation?

- 5. How can education and the sharing of knowledge about bees contribute to the conservation of our ecosystem?**

Do you think bee education is promoted enough in schools? How could we change this?
